

Electro-Voice MICROPHONES

DYNAMIC SERIES — ELECTRO-VOICE DYNAMIC MICROPHONES are designed to give the ultimate in all around microphone performance. The response is smooth and wide, giving realistic reproduction on music and voice. The diaphragm is genuine duralumin and heat treated to produce the desired flexibility. The internal transformer employs high permeability core. The case design gives increased discrimination against rear pick-up greatly reducing feed-back and reverberation. Available in Direct-to-Grid (Hi-Z). Also 50, 200 or 500 ohms.

Model 630 — Smart modern appearance, excellent frequency response and flexibility of operation typify the new 630. Frequency response: 30-9,000 c.p.s., unusually flat through the lower and middle register rising 5 DB on the upper frequencies for added crispness of speech. Output: -55 DB. Full equipment includes "on-and-off" switch, tilting head for directional or non-directional operation, 20' cable (all low impedances are balanced to ground) and cable connector.

Model 630C Chromium Finish. List \$27.00
 Model 630G Gunmetal Finish. List 25.00

Model 620 — Designed for Function, the "620" merges style with the highest standards of performance. Response is smooth, crisp and true and covers the entire audio range from 30-10,000 c.p.s. Output: -55 DB. The head tilts 180° allowing directional or non-directional operation. The microphone head can be removed by unscrewing the locking nut. Inherent construction makes it impervious to moisture, rough handling and extremes of temperature. Equipped with 20' low capacity cable.

Model 620C Chromium finish. List \$30.00
 Model 620G Gunmetal finish. List 27.50

Model 610 Dynamic — A low priced dynamic microphone with features that have, in the past, been confined to high priced microphones. The head is mounted in a steel reinforced cradle and can be tilted for directional or non-directional pick-up. Amphenol cable connectors do not interfere with the tilting of the microphone head. It is impervious to extremes of temperature, salt air and rough handling. Frequency response: 40-8,000 c.p.s. Output: -58 DB. Equipped with 8' low capacity cable. List Price \$22.50

..... \$22.50

Model 600 Mobile-Mike — Designed for close talking work, sports announcing, mobile P.A., and communication. It weighs 13 ounces and makes possible long periods of use without fatigue. A rising frequency response gives clean, crisp speech. Dynamic construction insures freedom from injury by heat, humidity and rough handling. The finish is light gunmetal with chromium grill and trim. Switch is slide-to-talk type. Frequency response, 50-8,000 with attenuated low frequencies. Output: -57 DB. Locking cable connector, 8' cable. List Price \$25.00

..... \$25.00

VELOCITY SERIES — The V Series has straightforward, functional design. Time has proved the correctness of this fundamental engineering in installations the World over. The NEW "V Series" sets even higher standards of performance. The woven housing allows the sound to pass through without reflection and eliminates the most frequent source of distortion in velocity microphones. The result is less feed-back and higher fidelity. Reproduction is natural, conveying accurately shadings and overtones of music and precise inflection of voice. Available in Direct-to-Grid or all popular low impedances.

Model V-1 — America's ONLY high fidelity Velocity Microphone in the popular price group. It is small in size, flexible in operation and will not hide the speaker's face. Frequency response is from 40-10,000 c.p.s., substantially flat when placed 6" or more from sound source. Output: -65 DB. Full "V" Series equipment including 20' cable, connectors, shock-absorber, locking cradle and on-and-off switch. Excellent for Public Address, Recording and Communication. List Price \$25.00

..... \$25.00

Model V-2 — The basic design has been proven in thousands of installations. NEW V-2 embodies every desirable engineering innovation. It is 1/3 larger than the V-1 and the ribbon assembly is rubber suspended. Appearance is trim, modern and functional. Frequency response 35-11,000 c.p.s., substantially flat when placed 6" or more from sound source. Output: -64 DB. Full "V" Series equipment is provided including 20' cable, connectors, on-and-off switch, and locking cradle. Ideal for wide range Public Address, Communication, and Recording. List Price \$35.00

..... \$35.00

Velocity Model V-3 — A new creation with exclusive features. Similar in appearance to the model V-2 and has slightly extended frequency response. The NEW V-3, equipped with the Vari-Z selector is an all impedance microphone. (50, 200 and 500 and Hi-Z, direct-to-grid). Low impedances balanced to ground. Adaptable to all pick-up.

List Price \$50.00
